

Eliminate Cold Spots

EXPERIENCE RADIANT COMFORT IN ANY SPACE

Contour

RADIANT HEATING SYSTEMS

DESIGNED FOR CEILING GRID APPLICATIONS AND CAN ALSO BE SURFACE OR FLUSH MOUNTED OR SUSPENDED.

The Architectural Series Radiant Heating Systems are an ideal solution near windows or drafty areas. Simple to install, these innovative heating systems are as aesthetic as they are practical.

Discover the Difference

WITH THERMARAY'S CONTOUR RADIANT HEATING SYSTEMS

Efficient

Increase Perimeter Comfort

Radiant heat warms the glass and walls making the area more comfortable.

Effective

Stops Drafts

Radiant heat warms people and objects rather than air.

Economical

Lower Life Cycle Costs

Easy to install for new or renovation projects with virtually no maintenance.

Comfortable

Create Warmth Anywhere

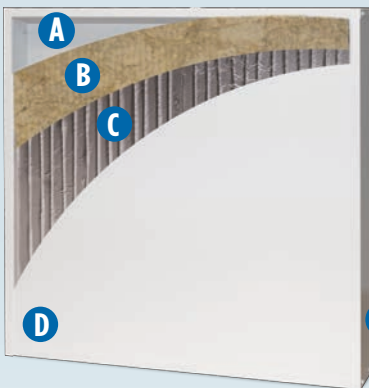

Eliminate any cold spot anywhere in your building.

Flexible

Looks Great

Blends beautifully in any design or supplement your current heating system for easy renovation or retrofit.
