

Got Snow & Ice?

REDUCE YOUR RISK OF SLIPS & FALLS

Snow & Ice Melting

ELECTRIC RADIANT SYSTEMS

Engineered to automatically keep your exterior surfaces free from snow and ice, keeping your employees and guests safe from cold weather slips and falls.

Let's Clear Your Paths!

WITH THERMARAY'S SNOW & ICE MELTING RADIANT SYSTEMS

There are over 300,000 Emergency Room visits and over 12,000 fatalities related to slips and falls due to ice and snow annually. According to Zurich Insurance, the average general liability claim is \$15,132 and the average worker's compensation claim is \$29,056.

We all recognize the importance of effective snow removal plans. Unfortunately, Mother Nature often has other plans for winter weather that will overwhelm even the most diligent efforts to shovel, plow and use salt and other chemicals.

ThermaRay's Snow Melting System can prevent slips and falls by melting ice and snow before it accumulates and freezes. Snow Sensors monitor moisture and temperature to detect when ice or snow is imminent, activating the system and keeping walkways free and clear of ice and snow until the inclement weather conditions subside.

Keep your building entrances, sidewalks, walkways, steps, ramps and parking lots clear of ice and snow for your guests and employees to reduce your liability this winter.

- ✓ Reduce Liability
- ✓ Potentially Reduce Worker's Comp Claims
- ✓ Reduce or eliminate need for Salt or Other Chemicals
- ✓ Improve Employee & Guest Safety
- ✓ Reduce Snow Removal Time & Costs
- ✓ Easy Installation Under Concrete & Pavers
- ✓ Snow Sensing Controls with Black Ice Detection
- ✓ Reduce tracking in dirt and sand in your lobby
- ✓ Energy Efficient & Effective
- ✓ Comprehensive Project Design Support
